How is the revised Art and design scheme of work organised?

What are the benefits of the revised Art and design scheme?

Over 2022 we have been rolling out a revised Art and design scheme of work, as an alternative to our original scheme. The revised scheme includes updates to many existing lessons, along with brand new units across the core areas.

Sequential lessons

The revised Art and design scheme has units divided into four core areas, repeated in each year group. This provides teachers with greater clarity over knowledge and skills progression within the four areas. Teachers can feel confident that children are given opportunities to develop mastery by revisiting core subject knowledge and applying that knowledge practically in a range of contexts with growing complexity.

Drawing

Painting and mixed media

Sculpture and 3D

Craft and design

A broad and balanced art curriculum

The units within the revised scheme are designed so that children experience the fundamentals of art through broad and balanced units, including exploration of the work of a wide range of artists and makers. Units guide pupils in the skills required to explore, analyse and discuss art. They are encouraged to combine their knowledge of what constitutes 'art', specific artists and techniques with their own experiences to evaluate artworks and to inform their own creative practices.

Each unit works towards all of the National curriculum attainment targets. This allows pupils to develop their knowledge and skills around the formal elements in a holistic way.

A variety of outcomes for units

The revised scheme encourages autonomy, with a greater emphasis on children developing their creativity through experimentation and individual responses. Units provide flexible options, enabling links to other topics and resulting in more creative outcomes.

Application of skills and knowledge

There is an emphasis on developing children's use of sketchbooks throughout the revised scheme to apply skills and knowledge. Lessons provide opportunities to engage with sketchbooks throughout the whole process of creating art, including practising techniques learned as well as developing and evaluating their ideas towards an outcome.

To know that artists create pattern to add expressive detail to art works, for example Chila Kumari Singh Burman using small everyday objects to add detail to sculptures.	To know that pattern can be created in many different ways, eg in the rhythm of brushstrokes in a painting (like the work of van Gogh) or in repeated shapes within a composition.

To know how to use texture more purposely to achieve a specific effect or to replicate a natural surface.	To know how to create texture on different materials.	To know that applying thick layers of paint to a surface is called impasto, and is used by artists such as Claude Monet to describe texture.

To know that shading is used to create different tones in an artwork and can include hatching, cross-hatching, scribbling and stippling.	To know that using lighter and darker tints and shades of a colour can create a 3D effect. To know that tone can be used to create contrast in an artwork.	To know that tone can help show the foreground and background in an artwork.	To know that chiaroscuro means 'light and dark' and is a term used to describe high-contrast images.
